What are the risks of investing?

Risk indicator for GoalsGetter Nikko AM Conservative Fund

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at <https://sorted.org.nz/tools/investor-profiler/>.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the five-year period to March 2025. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates. See the product disclosure statement (PDS) for more information about the risks associated with investing in this fund.

How has the fund performed?

| | Average over past 5 years | Past year |
|--|---------------------------|-----------|
| Annual return (after deductions for charges and tax) | 3.32% | 3.79% |
| Annual return (after deductions for charges but before tax) | 3.98% | 5.12% |
| Composite of market index annual return and peer group indices annual return (before charges and tax) | 3.88% | 5.55% |

Nikko AM is relying on the Financial Markets Conduct (Market Index) Exemption Notice 2024 and have created a composite index in order to calculate the market index annual return. The Manager believes the use of a composite benchmark for these funds would be useful to investors in assessing the performance of the fund as a whole. The composite market index for each fund is made up of the index of the underlying sector funds (where an AMI or PGI is available) multiplied by the respective target investment mix. Some of the underlying sector fund index returns include imputation credits. The fund returns include imputation credits.

Additional information is available on the officer register at <https://disclose-register.companiesoffice.govt.nz/>.

Annual return graph¹

This shows the return after fund charges and tax for each year ending 31 March since the fund started. The last bar shows the average annual return since the fund started, up to 31 March 2025.

Important: This does not tell you how the fund will perform in the future.

Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

What fees are investors charged?

Investors in the Conservative Fund are charged fund charges. In the year to 31 March 2025, these were (inclusive of GST where applicable):

| | % of net asset value |
|--|------------------------|
| Total fund charges | 0.88% |
| Which are made up of: | |
| Total management and administration charges | 0.88% |
| Including: | |
| Manager's basic fee | 0.88% |
| Other management and administration charges | 0.00% |
| Total performance-based fees | 0.00% |
| Other charges | \$ amount per investor |
| Annual membership fee | \$30 per annum |

Investors may also be charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). See the GoalsGetter KiwiSaver Scheme – Diversified Funds PDS for more information about those fees.

Example of how this applies to an investor

Small differences in fees and charges can have a big impact on your investment over the long term.

Simon had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Simon received a return after fund charges were deducted of \$512 (that is 5.12% of his initial \$10,000). Simon also paid \$30 in other charges. This gives Simon a total return after tax of \$349 for the year.²

There is currency exposure on international assets in the fund as only a portion of this is hedged. Currently the fund's foreign currency exposure is 8.21%.

For underlying funds that the Fund invests in which use currency hedging, foreign currency exchange contracts are used to mitigate currency risk. However, it is not possible to fully mitigate all currency risks, and therefore the currency hedging in place may not fully replicate the currency exposure of your investments. It should be noted the allocation to funds which currency hedge their assets comprises the value of the underlying assets and the value of the currency hedges. Accordingly, as the value of currency hedges change the exposure to underlying assets will be less than or greater than the disclosed allocation.

For more information on currency exposure please refer to the Statement of Investment Policy and Objectives (SIPO) which can be found on the Disclose register at <https://disclose-register.companiesoffice.govt.nz/>.
